

Company Profile

Since its establishment, SonoScape has been committed to providing high quality medical equipment for the healthcare sector. SonoScape specializes in the development and production of diagnostic ultrasound solutions. By introducing advanced imaging techniques, SonoScape has improved diagnostic accuracy and therefore enabled better health outcomes. Since 2002, SonoScape has reached and benefited millions of people. With the world in mind, SonoScape will continue providing more effective and accessible healthcare solutions, through persistent innovation and passion for life.

Quote from the Analyst of

"The Frost & Sullivan Award for Growth Leadership is presented to the company that has demonstrated excellence in capturing the highest annual compound growth rate for the last 3 years...The sales of ultrasound devices contribute an overwhelming proportion of total revenue, helping the company strengthen its leading position to outperform the competitors in the marketplace. With increasing penetration of mid-to high-end ultrasound devices, SonoScape is expected to see significant growth potential in the future..."

Company Milestone

- 2002: Company Founded in Shenzhen, China
- 2003: Released SSI-1000: the 1st 15" Portable Color Doppler system in China
- 2004: Released SSI-2000: the 1st PC platform Color Doppler system in China
- 2005: Received the "High Technology Company" award from the PRC government
- 2007: Received "CHINA TOP BRAND" award in the Medical Equipment Industry
- 2007: Released the 1st Real time 4D ultrasound system in China
- 2008: Received "European Entrepreneurial Company 2008" award from FROST & SULLIVAN
- 2008: Received "Flagship Company" award in the Medical Equipment Industry in China
- 2009: Received "Product Quality Leadership Award 2009" from FROST & SULLIVAN
- 2011: Received the Reddot 2011 Product Design Award for S20 in Essen, Germany
- 2013: Received "Ultrasound Market Growth Leadership Award, 2013" from FROST & SULLIVAN
- 2014: Received the IF Product Design Award 2014 for S9 in Munich, Germany

SonoScape

S30

Caring for Life through Innovation

Experience a Renewed Freedom to Use Ultrasound

S30 is a powerful and versatile general imaging system that helps meet a wide variety of general imaging needs. The sleek console slips easily into tight spaces, yet is packed with powerful technology that delivers excellent diagnostic images with quality, speed and precision. With the vision of simplicity and performance, S30 empowers you to easily make the most of the latest technology available.

S30 helps clinicians perform ultrasound exams that involve comparing images to prior examinations. With this feature, clinicians can view a prior study while conducting the current exam via a simplified ultrasound workflow.

- M-tuning automatic optimization provides image refinement for B-mode and pulse wave Doppler studies in one keystroke.
- Auto-trace and semi auto-trace make spectral measurements simple and accurate.
- Auto-IMT enables efficient and streamlined vascular risk assessment studies.
- Smart patient file management allows easy access to patient image and data storage, review, retrieve and report.
- DICOM formatting and various data solutions ensure efficient data transfer and management.

Excellent Performance

S30 features advanced technology that gives you the ability to capture excellent images on routine to difficult exams. The innovative system architecture provides the foundation for its best-in-class capabilities. All the classic and newly invented features will take your imaging to the next level of excellence.

Novel piezoelectric materials and increased bandwidth of S30 transducers allow the use of wide frequency range to capture uniformly clear images, even on the most demanding patients.

Innovative new THI filters suppress noise in the signal to boost contrast resolution throughout the images, displaying highly improved 2D, color flow and spectral Doppler images.

The second-generation μ -scan technology greatly improves the visibility of organs and lesions with improved, high-definition contrast resolution that suppresses speckle artifact while maintaining real tissue architecture.

Real-time panoramic and trapezoidal imaging expand your field of view providing additional B-mode information and anatomical references of large organs and masses for ease of measurement and diagnostic efficiency.

SonoScape provides S30 with compression C-Xlasto elastography to support assessment of tissue elasticity. The differences in tissue response are detected and visualized in real-time through different graphical representations, which can be particularly helpful in analyzing breast, thyroid and musculoskeletal structures.

Every design decision on the S30 is made with patient and user comfort in mind, reducing stress without compromising diagnostic performance. The S30 has features designed to help enhance workflow, mobility and convenience, including:
